Senthil Nathan Mruthulan

Diploma in Information Technology Student @ Singapore Polytechnic | Aspiring Full Stack Developer | Seeking Job
Singapore

Summary

I am a Year 2 Information Technology student at Singapore Polytechnic with a strong interest in software development and full-stack web development. I enjoy building practical web applications that solve real problems, especially projects that connect user-friendly interfaces with backend logic and database-driven features. One project I built was an appointment booking website for a local barbershop, which was deployed online using Render. This gave me hands-on experience creating a system for real users, not just for an assignment. I also had the opportunity to take part in the Autodesk Singapore Hackathon, where my team won Champion. Through that experience, I learnt how to work under pressure, contribute to a technical solution within a short timeframe, and communicate ideas clearly as part of a team. I am currently looking to grow further as a software or full-stack developer, with a focus on building reliable, useful, and user-friendly digital products.

Experience

Watsons Singapore

Retail Associate

March 2025 - April 2025 (2 months)

Singapore

Managed cashier duties and supported customers with purchases, payments, and self-checkout kiosks.

Ensured shelves were well-stocked, organised, and properly rotated by checking product expiry dates.

Supported promotional activities by distributing flyers and assisting with crowd flow during peak periods.

Resolved customer queries and provided store navigation support to improve the shopping experience.

Education

Singapore Polytechnic

Diploma in Information Technology · (April 2025 - May 2028)

Bukit View Secondary School

· (January 2021 - November 2024)
